Etiology

Model

HYPERTENSION

Genetic
- SHR
- SHR-SP*
- Dahl SS rat*
- TGR(mRen2)27 rat*

Renal
- UniNx DOCA-salt rat*
- Goldblatt 2K1C rat*

Pharmacologically induced
- L-NAME treated rats/mice
- Angiotensin II treated rats/mice*

* Non disclosable information for confidentiality reasons

Since each model exhibits specific characteristics and different sensitivity to reference anti-hypertensive agents, the choice of an hypertension model will be adapted to the client's needs
